

# What's new in BD<sup>®</sup> Research Cloud?

Reimagine how you work!

BD<sup>®</sup> Research Cloud (BD RC) is a unique suite of tools built by the creators of FlowJo<sup>™</sup> Software that facilitate the entire flow cytometry workflow, from panel design to data analysis.

## Check what's new!

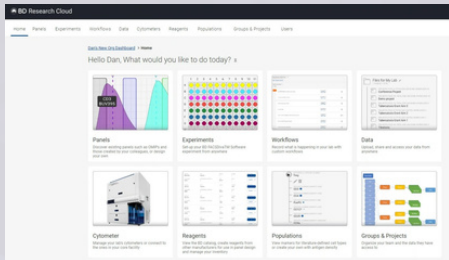

BD RC suite of tools help you:

- Consolidate and integrate your experiment environment for all things flow
- Increase efficiency
- Share data more easily
- Better organize your lab and data
- Integrate with FlowJo<sup>™</sup> Software
- Manage your reagent inventory and titer information

**Sign-up for free: [bdresearchcloud.com/login](https://bdresearchcloud.com/login)**

## Discover features that will enable you to:

- Store and share cytometer configurations for panel design
- Design and purchase flow cytometry panels
  - Reagent inventory, titration information
  - Antibody cocktail/Master mix calculations
  - FACSDiva™ Software acquisition setup away from the cytometer
  - Data storage for your FCS files and other documents
- Open analysis files directly in FlowJo™ Software

## Resources

**FLOWJO UNIVERSITY** [flowjo.com/learn/flowjo-university/bdrc](https://flowjo.com/learn/flowjo-university/bdrc)

Flexible training on your schedule. From introductory to advanced online resources, FlowJo University can help you turn burning curiosity into trailblazing discoveries.

**WEBINARS** [flowjo.com/learn/webinars](https://flowjo.com/learn/webinars)

Tune in and take off. Our trained experts help you get the most out of your analyses with monthly live webinars. Watch our previously recorded webinars at your convenience.

**DOCUMENTS** [flowjo.com/documents](https://flowjo.com/documents)

Check out featured brochures and videos to advance your science.
